

Jordi Vidal, the sports secretary of the Formentera Council, was joined today by Espalmador Sport Group chief Rafael López and Unisport Consulting's Manuel Hernández for an up-close look at the Volta Cicloturística beginning tomorrow, Friday, October 27, and concluding Sunday the 29th.

The race, which will not require any roads be blocked, is expected to draw some one hundred cyclists. It is split into three segments, measures 110km in length and includes a 1,168-metre altitude change. Plus, more serious bikers are invited to take part in the 23rd BTT La Mola—a race for *bicicletes tot terreny*, "all-terrain bikes", spanning 37.6km and a 850-m altitude shift. Scores from the event will count for the Pityusic BTT *campionat* ("championship") on Sunday.

The Balearic Tourism Agency, or ATB, sponsors the second Volta Cicloturística, a signature part of the Discover Formentera in October catalogue to foment more travel to the island during the traditionally slower low-season months.
