

The Office of Tourism of the Consell de Formentera is pleased to announce that pianist and composer Alessandro Martire released a video of his new song "Faro de la Isla" today. Martire says that not only was the music inspired by Formentera lighthouses, they are also where the video was shot: La Mola lighthouse at sunrise, and Es Cap de Barbaria lighthouse at sunset.

Martire traced his decision to his love of "these inspiring places and their incredible nature". For the occasion, he brought the same Waves piano with which he gave a concert in Sant Francesc's Plaça de la Constitució last summer. The Office of Tourism Promotion has supported this project that associates the island with creativity, music, nature and tranquility.

Since 2021, Alessandro Martire has cultivated an original format with his Waves piano and shot video clips in natural locations like glaciers, frozen lakes, rivers and 3,000-metre-high mountains. Some of his other creations can be seen [here](#).

The pianist and composer was born in Cuomo, Italy in 1992, and composed his first song at the age of 15. Inspiration for his songs is drawn from both classical and contemporary music.
