

Formentera firefighters have responded to several incidents caused by strong winds on the island this Monday morning.

At 11.00am the crew snapped into action in Sant Ferran to keep telephone pole on the side of avinguda Joan Castelló Guasch from toppling over. They also stepped in to take down shutters in danger of falling from a first-storey flat and another lamp dangling precariously from a post.

Lastly, crew members cut and removed a small tree that winds had left in the middle of the road.
