

Before summer, the Formentera Council's office of infrastructure will equip the towns of Sant Ferran and Es Pujols with 15 new lampposts, and a total of 24 lights. According to department head Rafael González, in recent weeks municipal crews have installed nine streetlamps along two Sant Ferran streets, *carrers* Sol and Castaví, “where the Citroën is located”.

Saying the crews' work would precede the start of the upcoming tourist season, the councillor detailed plans to install seven new lampposts “near the Sant Ferran roundabout, (along *camí* de Ses Vinyes), between *carrers* Tarragona i de Sa Finca” as well as “three more on *camí* de Cala en Baster.

Work in Es Pujols

In Es Pujols, the public works will include three new lampposts “on *carrer* King Crimson, at the Es Pujols chemists” and two more “on *camí* de Can Jaume d'en Sala, expanding on last year's installation of three streetlamps there”.

Said Councillor González, “this came at the petition of local residents, who requested improvements to the outdoor public lighting on the island”. González stated the total cost of the instalation was approximately €30,000.
