

The Formentera Council infrastructure department reports that the municipal pool will be closed from 15 to 30 June, inclusive. Over the two week period, crews will carry out reforms and maintenance which are valued at €19,727 and necessary to the proper functioning of the pool.

First on crews' to-do list are repairs of the roof, to be handled by an outside firm for €15,167. The company will also check fixing rods in air conditioning pipes for €1,300. A construction firm will be brought in to waterproof the compensation vessels of the small pool for €3,261. All prices include the value added tax.

The Council's in-house work brigade, or Brigada, will oversee work as well, including repairs to damaged tiles, rust removal and checking joints on the large and small pools.
