

The Council of Formentera wishes to make known its consternation in light of a recent display of incivility by the Govern Balear. The Bauzà administration, in its scheduling of a trip by the community president to Formentera, neglected to invite a single member of the local administration to any of the president's planned activities.

Such behaviour is all the more troubling considering Formentera Council is an active participant in the current projects to bestow Sant Ferran with government housing and a new school. Our island council purchased and then ceded to the Govern the land for these projects, and deserved to be present at any corollary gatherings.

It is worth noting that Eivissa Council representatives and members of other Eivissa town councils were themselves asked to attend the events scheduled as part of Bauzà's visit to that island today.
