

According to the Formentera Council's office of transport, as of today's date 3,532 residents have received the decal/pass that permits its holder to park in la Savina. Blue decals—for Formentera residents—have been distributed to 2,951 drivers; 223 drivers have received the green decal specifically for residents of la Savina; and 358 parking passes have been delivered to drivers of company vehicles.

The office also reported that 1 June would be the final day of the ticketless warning period. After that date, any infraction of the established regulations will be met with a ticket and accompanying fine. Until now, fines had only been issued to repeat parking offenders or drivers with long-stay parking infractions.

Council representatives have hailed the increased availability of parking that followed the new system's March implementation. The Formentera Council wishes to remind any drivers without residency in Formentera—and thus ineligible for free regulated parking—that they have a 110-space car park at their disposition opposite the Illes Pitiüses park, and on the Estany des Peix-side, of la Savina. The Council also wishes to remind drivers that electric vehicles are exempt from blue zone payment requirements and that from 12 midnight to 9 a.m., parking in all blue zones is free.
