

The Formentera Council's Office of Infrastructure and Mobility wishes to announce that due construction work on two streets, carrer Guillem de Montgrí and carrer València, a new car park will be made available from Thursday, December 7. According to department head Rafael González, the 70-vehicle lot will be 75 metres from the arterials' juncture, with access from the nearby roundabout. The idea, assured González, is to minimise the inconveniences caused by the road work and let drivers in Sant Ferran park close to home.

The bus stop that was previously located on avinguda Joan Castelló i Guasch and which provided service to lines L1, L2 and school buses will be moved to the roundabout as well. Rubbish collection will also be suspended on the two thoroughfares and relocated to the roundabout. All part of an effort, González assured, to keep the inconvenience to a minimum.

The changes will remain in effect over the course of the road work, which is scheduled to conclude on May 1.
