

Consell de Formentera premiere Alejandra Ferrer and the president of the Livestock Farmers of Formentera (Associació de Ramaders de Formentera, ARF), Juan Antonio Yern, have signed a deal to support the local livestock sector on animal health and improved production systems in 2021. The gathering was also attended by primary sector chief Josep Marí and farmers' co-op manager Carlos Marí.

Under the arrangement, which must be renewed yearly, local government will put up €37,000 to benefit animal production and health, while ARF pledges to support production, animal welfare and efforts to identify animals on Agrupació de Defensa Sanitària-affiliated farms. ARF will additionally implement the jointly accorded provisions of the yearly Common Health Programme, not to mention continue outreach to educate member farmers about individual actions.
