

Day Centre stays closed following new Covid case

Wednesday, 03 March 2021 10:36

The Formentera Department of Social Welfare reports that the island's dependent adult day care facility will remain closed this week after a local service user tested positive for Covid-19. Per public health protocol, the six carers in close contact with the patient, whose case remains active, must stay home and isolate. Screenings administered last week to day centre beneficiaries and personnel came back negative. If no new cases emerge, the Formentera Day Centre will reopen Monday 8 March.
