

The Formentera Council and the local taxi drivers' association (Associació de Taxistes de Formentera) have signed a deal giving the group access to GPS information on remote lots and other areas of the island. Council chairman Jaume Ferrer and José Antonio Ferrer, the group's leader, made the deal official today.

The Council uses an app, called TwoNav, which provides maps and information about properties across Formentera. Aimed at expanding and improving the island's taxi service, the deal will allow the cabbies' association access to TwoNav's data.
