

Formentera Council president Jaume Ferrer and Dolores Fernández Tamargo, chairwoman of the association Espai Dones, signed into action a €3,000 agreement to foment equality and defeat domestic violence in 2018. The document traces the contours of the Council and Espai Dones's coordinated engagement on action related to equality promotion and ending gender violence.

Espai Dones Formentera is a not-for-profit group which sees the feminist struggle as a vector for broad societal support for and recognition of gender equality. To get there, the group leans on tactics that vary from educational to fun and lighthearted. Recent campaigns have been geared towards advancing and enlivening the debate about gender equality and women's rights.

From the start, the association has pegged their efforts to annual international celebrations such as Women's Day and Day for the Elimination of Violence against Women. The two entities first teamed up in 2013. This year their partnership turns six.
