

The Formentera Council's office of sports will oversee remodelling work at the indoor swimming pool over the Christmas holidays. Once its doors close at half past ten in the evening on 19 December, the locale will remain inoperative until 2 February.

To avoid any confusion, a clear distinction must be made between the Antoni Blanc sports centre and the swimming pool: the sports centre will be closed only long enough to accommodate staff holidays. It will shut its doors from eleven in the evening on 23 December only to open them once again bright and early, quarter to eight, 7 January.

Planned construction at the swimming pool – the first major upgrade in 19 years – is intended to tackle a handful of safety issues. In addition to cleaning rust deposits from the pool bottom and replacing existing stone lining, workers will undertake a variety of other smaller reforms, such as the installation of new entry ladders.
