

The Formentera Office of Island Services has started renovating the children's playground in Plaça de les Illes Pitiüses in La Savina. Crews will replace the rubber flooring and instal new playground equipment like a three-tower structure, two suspension bridges, two slides, two access ladders, a musical panel and a triple-seat swing.

The surrounding wall will also be upgraded. The seven-day project will not impact the artificial turf, calisthenics and basketball areas.
